I. THE TRIPLET-LOSS PIPELINE

In this supervised similarity or metric learning, the Triplet-Loss pipeline consists of

1) Retrieve images from CUB200_2011 dataset within `TripletCUBDataset` class
2) Transform images into tensors and apply additional augmentations to the training set only
3)
4)

II. TRAINING HYPER-PARAMETERS

We conducted 4 experiments using two pre-trained models: ResNet18 and ResNet34
ResNet18 contains ... million parameters
ResNet34 contains approximately 21.5 million parameters

1) epochs: 20, learning rate: 0.001, batch size: 32
2) epochs: 20, learning rate: 0.002, batch size: 32
3) epochs: 20, learning rate: 0.001, batch size: 64
4) epochs: 20, learning rate: 0.002, batch size: 64
